### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

#### Abstract

[The invention relates to a] A wind turbine with a rotor and[,] a generator driven by [it], the rotor [which] generates electrical power and delivers it to a power system[, and a] A control unit [which controls] controlling the operation of the plant [and has] includes a reactive-power control module. [According to the invention, it is provided that the] The control unit [has] includes also a determining device for a safe minimum active power. Furthermore, it comprises] and a limiting device for the reactive-power control module, [in such a manner that] wherein the reactive power is limited to such a measure that the safe minimum active power is still available, taking into consideration the available [apparent] power. As a result, the total current generated, apart from the active current required for the safe operation of the plant, can be fed into the power system as reactive current as backup in the case of a voltage drop. [The invention is also related to a corresponding method.]

2. The following is an examiner's statement of reasons for allowance:

Re claims 1 and 10, the Prior Art of record discloses several variations of wind turbine generator systems controlling the system active and reactive loads. However, it

does not disclose or reasonably suggest the control unit having a determining device for a safe minimum active power and a limiting device connected to the determining device and to the reactive-power control module that interacts in such a manner that, at the most, as much reactive power is generated that the safe minimum active power is still available, as recited in independent claims 1 and 10.

Claims 2-9 are allowed as being dependent on allowable claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
